

COMMITTED TO THE ENVIRONMENT

June 1, 2018

Newfoundland Power is committed to providing electrical service to its customers in an environmentally responsible manner. The Company will integrate environmental and sustainable decision-making practices into its operations to meet present needs and safeguard our environment into the future.

Newfoundland Power will:

- Meet the requirements of all applicable environmental legislation, regulations, and accepted standards of environmental protection.
- Manage its activities consistent with best industry practice and support the environmental policies of federal, provincial and municipal governments.
- Ensure environmental monitoring and audits of our operations and environmental management system will be conducted regularly.
- Strive to conserve natural resources, prevent pollution and promote the efficient use of electricity.
- Set and review environmental objectives, targets and programs annually and commit to continual improvement in environmental performance.
- Make available its policy and knowledge on environmental issues to customers, employees and the general public.
- Support and participate in community based projects and where reasonable, participate in meaningful dialogue with environmental groups.
- Work in partnership with Contractors to ensure environmental requirements established by the Company and required by legislation are met.
- Provide training for employees to enable them to fulfill their duties in an environmentally responsible manner.

WHENEVER. WHEREVER.
We'll be there.
