

# ENGINEERING TECHNOLOGIST

ST. JOHN'S – CLOSING DATE: OCTOBER 19, 2018

COMPETITION NUMBER: NPJP-2018-18822

## Are you ready to explore an exciting career in a fast-paced, high-performance environment?

If you are seeking a challenging and rewarding career with room for continuous advancement and a competitive compensation package, have we got an opportunity for you! We are looking for a highly motivated team player with a strong commitment to safety and customer service, an excellent work ethic, and effective interpersonal and communication skills.

As a valued member of our Transmission Engineering Team you will be responsible for: designing and managing overhead and underground transmission line construction; utilizing computer software to optimize and analyze transmission line designs; developing transmission line tender packages for rebuild and maintenance projects; providing technical leadership to construction crews and contractors; and, interacting with customers, councils, and other regulatory bodies.

Qualifications include a diploma in Electrical or Civil Engineering Technology. You must hold and maintain a valid motor vehicle driver's license. Proficiency with Microsoft Office applications, TL-PRO or PLS-CADD, and AutoCAD is necessary. You have a strong knowledge of industry standards and practices as they relate to the design of utility transmission systems. You have strong analytical, and project management skills and are able to execute technical tasks with particular attention to detail.
