

MANAGER, CYBERSECURITY AND NETWORKS

ST. JOHN'S – CLOSING DATE: MAY 28, 2019

COMPETITION NUMBER: NPJP-2019-23374

Are you ready to explore an exciting career in a fast-paced, high-performance environment?

If you are seeking a challenging and rewarding career with room for continuous advancement and a competitive compensation package, have we got an opportunity for you! We are looking for a highly motivated team player with a strong commitment to safety and customer service, an excellent work ethic, and effective interpersonal and communication skills.

As a valued member of our Technology Team, you will be responsible for leading a team to develop and deliver solutions that protect enterprise information technology and operational technology, applications and data. You will develop and maintain cybersecurity strategies, and ensure compliance with established cybersecurity practices. This includes design and continuous improvement of cybersecurity architecture, operational procedures, and overall security awareness within the Company. You will perform risk assessments, using an established cybersecurity risk management framework, and create plans to mitigate identified risks.

Your qualifications include a university degree or college diploma in Information Technology or a related field, supplemented by a minimum of 10 years' experience in security and networks including a minimum of 3 years' experience in project management. You have expert knowledge and understanding of information risk concepts, a deep understanding of cisco-based networks, and experience in managing and maintaining network equipment. You have exceptional leadership skills and the ability to develop, communicate and execute a corporate vision. You are analytical, with a strong business acumen and have knowledge of budget planning and financial management. You must have exceptional judgment and perspective in managing multiple initiatives in a complex IT environment. Certifications such as GICSP, CISM, or CISSP and familiarity with cybersecurity frameworks such as NIST CSF would be an asset. Experience in Operations Technology and Industrial Control Systems would also be an asset in this position. You possess excellent leadership and facilitation skills and you thrive in a multi-project environment.

Apply online at newfoundlandpower.com/en/About/Careers/Career-Opportunities. We thank all applicants for their interest but only those selected for an interview will be contacted.

WHENEVER. WHEREVER.
We'll be there.
